Open Brief / Open Letter

to

- **Minister of Foreign Affairs Jordan** -

12 june 2008

Dear Salaheddin Al-Bashir,

You already know that the Netherlands is a dictatorship where members of parliament are not brought to court for serious cases of misconduct. Even a Dutch woman like me can't claim human rights.

Over the past few months you've read all about it on my websites.

- Jordan wants to start a lawcase against Geert Wilders, an Islam-hater. Hopefully, you will be succesful. Judges are supposed to create peace, not war. When you can't claim your rights in NL, you have to start a lawcase in Jordan against the NL-parliament.

But, this is not why I write you... today.

Jordan is a member of the Statute of Rome.

The International Criminal Court is a concentrationcamp.

Prime Minister of Portugal is reading my file at the moment.

President of ICC - Phillip Kirsch - is in Finland, where he has to answer some questions about activities taking place within ICC. The fact that the prosecutor mr. Luis Moreno Ocampo tortures me, for example.

I need Jordan to help me purify ICC from a 'typical Dutch corruption-method within NL-court-systems'. ICC uses identical corruption tactics & strategies like the Dutch Supreme Court does.

Namely, individuals and their files are being ignored, so they will never get their human rights for a normal life. ICC has given me freedom of speech on my sites, because they never intended to press charges against hostcountry NL.

I have to find myself a life in NL, without human rights, money, security...enz...

I did not receive a reply on my letter to the pre-Chamber-judge of ICC & UN Secretary-Gen.

Ban Ki-moon, so far.

Because OTP of ICC 'lies about everything' - proceedings, victumcare, security... - I don't trust the registrar either. Did the pre-Chamber-judge receive my letter or did OTP of ICC withhold it?

Jordan can make UN Ban Ki-moon investigate on the acts of ICC.

You can also make the EU-parliament acknowledge my case... and the consequences of it.

Please do! And, tell the truth to your own people.

Human Right Watch & Amnesty International refuse to investigate what's going on...here...

Favourism & laziness.

Last but not least

On my site NLF-Fair Trade & Eko you read about the waterpyramids of Martijn Nitzsche.

They recycle water. You need them!

Well, I've got a terrible headache...Am to tiered to do this all by myself....

Have a nice day ful of determination,
